SUMMARY

- I am Chengxi Deng, a Junior student from the School of Honors College, Northwestern Polytechnical University, major in Computer Science and Engineering. In Honors College, I learn a lot of basic subjects, which lay the foundation for my research and allow me to master new skills quickly. I'm interested in Deep Learning, Computer Vision, 3D Reconstruction, Low-level Vision.

EDUCATION

- Northwestern Polytechnical University** 2020-2024
- Grades:** 91.92/100 2020-2022
- Rank:** 3/114 2020-2022
- CET6:** 543

SKILLS

- Python(Pytorch), C, C++, SQL
- Git, LaTeX

Research Experience

- Single-view and Multi-view Reconstruction** 2022.7-now
During my research supervised by Prof. Jiaqi Yang, I've read over 40 papers concentrating on 3D-Reconstruction. AI is booming, but there is still a long way to go for this ill-posed question. We get some ideas, and partial codes are available on github.
- Neural Radiance Fields for View Synthesis** 2022.10-now
During my research supervised by Prof. Yuchao Dai, I learn some basic knowledge about computer graphics. Different from SDF value representation, NeRF and its related work show how reconstruction meets graphics.

Honors and Awards

- National scholarship, Ministry of Education of China** 2021.10
- National scholarship, Ministry of Education of China** 2022.10
- First-Class scholarship, Northwestern Polytechnical University** 2022.10
- Second Prize in RoboCup Advanced vision 3D-object recognition, Chinese Association of Automation** 2022.4
- Third Prize in RoboCup Advanced vision commercial measurement, Chinese Association of Automation** 2022.4
